PROJECTS

Mileage2Go ([Mileage2Go](#))

Mileage2Go is a great tool to calculate mileage for tax deductions and for expense reports. It is a web based application.

Worked as a backend developer and wrote unit and integration tests. Designed and developed a homepage for that.

Fixed bugs and errors instantly on every build failure.

End to End Encrypted notes app

E2E Notes app, helps the users with adding, storing and organizing their notes.

This app is built to Secure user data with **Advanced AES encryption** algorithm. Abstract link : [E2E Notes App](#)

CIT College Website

Developed UI in the section of listing and showing teachers and department information.
